The Digital Fine Art Exhibition

Reception: Thursday, December 15, 2005 6-8 PM

Exhibition Dates: 12/15/2005 - 1/10/2006

Press Release

A master of many techniques from pencil portraiture, figure illustration, murals, photographic canvas manipulation, collage and 3D rendering, to hyper abstract mindscapes, T. Mikey melds these creation modes into a style distinct, cutting, and fantastical. His phantasmagorical rendering of techno-realist landscapes employ expert body and spatial rendering befitting someone who has spent years studying figure drawing and the work of Renaissance masters with the intent of translating this acumen into a personal universe of hyper-realist, 21st century surrealism. Whether photo portraiture, epoxy painting, or digital and photo collage, these warm, sexy dreamscapes bleed fluorescent greens, reds, and blues, leering into the stratosphere, peering into the soul. Mikey is a master of capturing the figure, the mindspace, and manufacturing beauty and meaning through illusion.
